

ROCK-STAR LX™ BELT DISPLAY

REFERENCE GUIDE

LX BELT DISPLAY - NEWEST FEATURE ON THE ROCK-STAR LX

The Lx Belt, the newest promotional feature offered exclusively on the Rock-Star Lx, displays images for new album releases, artist hits and Flickr photo slideshows! This new animated display is located between the video attract loop and jukebox UI.

DISPLAY OPTIONS

There are 3 unique display options for the Lx Belt that an operator can choose from:

- **FEATURED ALBUMS** – Displays a random album from AMI's Spotlight albums.
- **NEW ALBUMS** – Displays a random new local album added to the jukebox within the last 30 days.
- **FLICKR SLIDESHOW** – Downloads the images from a Flickr photo set and displays them in a slideshow. Operators can set up a Flickr account for their company and create photo set slideshows for their locations or locations can manage their own images with a location Flickr account.

For a sample of how the slideshow will appear, please use the link below:

<http://bit.ly/videoslideshow>

The **FEATURED ALBUMS** and the **NEW ALBUMS** show the album cover, along with the title and artist of the album. If the patron touches the album, the album is then displayed in the Jukebox UI underneath.

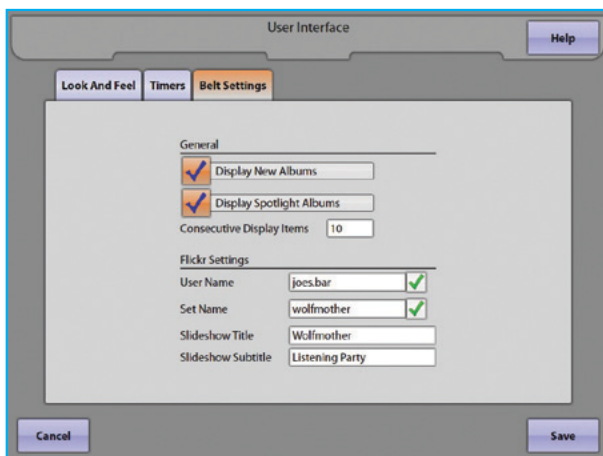

The **FLICKR PHOTO SET** slideshow scrolls the images from the photo set left to right. Locations and operators are responsible for setting up and managing their own Flickr photo set and Flickr accounts.

ROCK-STAR LX™ BELT DISPLAY

REFERENCE GUIDE
